

# ROOFING TIMES

ISSUE

06

With the relaxation of most Covid-19 restrictions in the UK we are starting to return to some sort of normality again. This is very much reflected in the NFRC events calendar, and I am delighted that the first in-person NFRC event since early 2020 is the Roofing Suppliers Group (RSG) conference in September. This looks set to be a fantastic event and an opportunity for our Supplier Members to meet in person for the first time in over 18 months.

The RSG conference will soon be followed by the **UK Roofing Awards** on **5 November at Intercontinental London—at the O2**. After the 2020 Awards live event had to be cancelled due to lockdown restrictions, this will be a chance to celebrate all the roofing industry has achieved over the last two years, in the face of adversity.

Continued on page 2

## UK ROOFING AWARDS 2021 SHORTLIST ANNOUNCED

UK ROOFING AWARDS 2021

FINALIST

NFRC

Following a thorough judging process, the shortlisted projects for the UK Roofing Awards 2021 have now been finalised.

Tables for the event can be booked at [www.nfrc.co.uk/uk-roofing-awards/attend](http://www.nfrc.co.uk/uk-roofing-awards/attend)

The Industry Choice Award, Sponsored by Radmat Building Products, will allow the industry to have its say on their favourite project through an open vote and will be opened shortly.

**WINNER OF THE 2020 'ROOF OF THE YEAR'**—Bodley Court in Cambridge (winning contractor: Claude N Smith Ltd)

### THE SHORTLIST FOR THE 2021 AWARDS IS AS FOLLOWS:

#### BITUMINOUS HOT APPLIED LIQUID WATERPROOFING

Campbell Wharf, Campbell Park—NRA Roofing & Flooring Services Ltd

Old Library Site, Slough—Malone Roofing (Newbury) Ltd

Vega Controls, Ashdown Business Park—ICS Ltd

Wessex Hotel—Roofsmiths LLP

#### FULLY-SUPPORTED METAL

City Chambers, Glasgow—City Building (Glasgow) LLP

Cliff Tops—Roles Broderick Roofing Ltd

LGBT+ Centre, Manchester—Longworth Building Services Ltd

The Pavilion Isle Of Wight—Roles Broderick Roofing Ltd

#### COLD APPLIED LIQUID WATERPROOFING

Chesil Cliff House—Western Flat Roofing Co

Hatfield Tunnel—Itech Roofworks Ltd

San Remo Towers Block E—Roofsmiths LLP

Sutton Court Road—Weatherwell Roofing Ltd

#### HERITAGE

Craig House—Southwest Roofing Services

Little Sodbury Manor—Ellis & Co

Old Westbury Mansion House—Claude N Smith Ltd

Sospan—Greenough & Sons Roofing

#### GREEN ROOFING

Ashraya—Sky Garden Ltd

Leeds Skelton Lake Motorway Services Living Green Roof—Cawston Specialist Roofing Ltd

The Centre for Agricultural and Biosciences International (CABI)—Malone Roofing

Williamsgate Water Treatment Works—Briggs Amasco

#### MASTIC ASPHALT

Pacific Court—Sussex Asphalte Ltd

St Anthonys, Oxford—SPV Group

Swaylands House—Infalible Systems Ltd

Worthing Dome Cinema—Sussex Asphalte Ltd

#### MULTI-DISCIPLINE LARGE SCALE (OVER £250K)

Places Leisure, Camberley—Progressive Systems Ltd

Gibside SEN School—Barclay Roofing

SCCC Cwmbran Critical Care Facility—Central Roofing South Wales

Woolwich Creative District—UK Roofing Specialist Ltd

#### ROOF SLATING

Leeds Town Hall—Harwood Roofing Contractors Limited

Old Radnor—Rowlands Roofing

Private House, Anglesey—Greenough & Sons Roofing Contractors Ltd

The Marine Hotel, Troon—Southwest Roofing Services

#### RAINSCREEN

Bournemouth University Gateway Building—T A Colbourne Projects Ltd

Gillingham—SPV Group

Marshall Street, London—Longworth Building Services Ltd

Southborough Hub—Industrial Construction (Sussex) Ltd

#### REINFORCED BITUMEN MEMBRANES

Church of the English Martyrs—Premier Roofing & Construction

Gusford Primary School—CWG Group

Natural History Museum at Tring—Premier Roofing Systems

Wythenshawe Forum—LRL Roofing Solutions

#### SHEETING AND CLADDING

BenRiach Distillery—Ronald G Graham Roofing and Building Ltd

Durrington High School—Industrial Construction (Sussex) Limited

Old Wallpaper Factory—BRC Industrial Roofing (Midlands) Ltd

Thales Air Defence, Belfast—David Jameson Roofing Services Ltd

#### ROOF TILING

Manor Farmhouse—Clarke Roofing Southern Ltd

Pendyke—Richard Soan Roofing Services

Seaford House—Emerton Roofing (Western) Ltd

The Gables—N T Sweeting Roofing Contractors Ltd

#### SINGLE PLY ROOFING

OCL Facades Ltd New Head Office—Contour Roofing (Essex) Ltd

St Johns Hill—DF Roofing Ltd

St Mary's Episcopal Church, Port Glasgow—Ashton Building Systems (Scotland) Ltd

The Warren—Invictus Roofing Ltd

#### SMALL SCALE PROJECT <£25K

Castle Road—M&J Group (Construction & Roofing) Ltd

The Cheese Barge, Paddington Basin—Roles Broderick Roofing Ltd

Village Hall Turret—Emerton Roofing (Western) Ltd

Writtle Junior School's Learning Pod—Mells Roofing

Continued

We are pleased to be able to exclusively reveal the shortlist for the awards in this edition of Roofing Times. You can find the full shortlist on the front cover of this issue! Good luck to all those shortlisted and thank you once again to all those who are helping make the awards possible, particularly our sponsors **Radmat Building Products, SIG Roofing, BMI, Axter Waterproofing Systems, Chandlers Roofing Supplies, Cromar Building Products, CUPA PIZARRAS, EJOT, FAKRO, Gro, Horrods, Marley, Metal Solutions, QANW, Recticel Insulation, Siderise, Sika, and TN International.**

As always, we are pleased to bring you a wide selection of different articles from our Supplier Members in this edition of Roofing Times. Our Supplier Members are made up of

a whole host of different companies and this is reflected in the rich and varied content they submit. In this edition of Roofing Times, you will hear from **ACO, Actis, BMI, CUPA PIZARRAS, EJOT, Hambleside Danelaw, Keylite, Klover, McCormack and Partners, A Proctor Group, Sundolitt and TN International.**

I hope you enjoy reading this edition of Roofing Times, and as always if you have any feedback please do get in touch.

**Steve Laurence**

## SUNDOLITT RECEIVE BBA CERTIFICATION FOR EXTRUDED POLYSTYRENE INVERTED ROOF INSULATION BOARD

**SUNDOLITT'S** extruded polystyrene (XPS) 300 Inverted Roof Insulation Board has been awarded BBA certification.

The insulation board is suitable for the inverted roof concept (*above roof waterproofing*) on new or existing domestic and commercial trafficked flat roofs, and balconies and terraced roofs subject to pedestrian access.

The high thermal performance insulation board is overlaid with Sundolitt's WRL (water-flow reducing layer) membrane, with a gravel ballast or paving slab finish applied on top, which ensures that the insulation system is warrantied for the lifetime of the building.

Sundolitt XPS offers exceptionally low moisture absorption through its closed-cell system, which helps maintain excellent thermal performance in wet environments such as inverted roofs.

Its strength and stability is unaffected even by water absorption, immersion and diffusion.

Colin Morrow, Sundolitt's General Manager, said: *"We are delighted that our XPS 300 inverted Roof Insulation Board has been awarded BBA certification following rigorous testing."*

*"This is the second product in recent months to be accredited and is part of our drive to ensure*

*we manufacture and supply proven, high-performance insulation products to the construction industry."*

Inverted roofs are cost-effective solutions and cost savings can be made by installing Sundolitt XPS Inverted Roof Insulation board over the weatherproofing.

Insulating over the weatherproofing prolongs the life and reduces maintenance of the membrane by reducing stresses caused by temperature extremes and UV exposure.

For further information, please visit **[www.sundolitt.com](http://www.sundolitt.com)** or call **0191 438 1023**.

# ACTIS HYBRID PLAYS STARRING ROLE ON NATIONAL TV PROGRAMME

Once again **ACTIS HYBRID** insulation has appeared on national TV, this time as part of a stunning coach house conversion in George Clarke's latest Channel 4 series, **Remarkable Renovations**.

Impressive footage shows swathes of Actis Hybrid products adorning the roof of the 200-year-old coach house as it undergoes a transformation from its former incarnation to a 5,000 ft<sup>2</sup> home by Adrian and Laura Neaves.

It saw builders create a timber frame within the original shell, both for structural reasons and to allow the

installation of 75 mm honeycomb insulation Actis Hybris and insulating vapour control layer H Control Hybrid.

They removed the original roof, installed new roof timbers, and insulated it with 75 mm Actis Hybris, H Control Hybrid and Boost R Hybrid.

The couple also demolished a barn which abutted the building and rebuilt a new structure using insulated concrete form blocks. The roof was insulated in the same way as the coach house, achieving an identical U-value.

Adrian explained: "I chose Actis for a number of reasons. One is the U-value, which is excellent. We've achieved 0.16 in

the roof and 0.19 in the walls. I wanted it to be quick, clean, and easy to install. I didn't need to wear a mask as there was no dust, and it was easy to cut and fit.

In addition, we didn't need such big roof rafters. With rigid board we would have needed 225 mm, but with Actis we only needed 150 mm. Plus it worked out a lot cheaper."

For further information please visit [www.insulation-actis.com](http://www.insulation-actis.com) or call 01249 462888.

## McCORMACK PARTNERS LAUNCH ROOFING RECRUITMENT CAMPAIGN

It has been a great achievement and a significant milestone for specialist roofing and cladding consultancy McCormack Partners to be welcomed into NFRC as a Service Provider Member and to receive support for both their recruitment services and their dedicated efforts in bridging the industry's skills shortage and generation gap through their **#PeopleMakeRoofing** campaign.

Studies suggest that 87 per cent of roofing and cladding contractors are unable to source and hire specialist staff when they need them. This 'recruitment headache' can be made even worse when dealing with recruiters, the vast majority of whom are generalists, working across multiple sectors, with little knowledge of the nuances within the roofing and cladding industry.

#PeopleMakeRoofing is an initiative to promote the attractive career opportunities through schools, universities, and colleges across the UK, by shining a light on the

industry's key personalities and the diversity of exciting roles—highlighting the rewards and earning potential to inspire the younger generation to consider a career within our industry.

With deep roots in the industry, McCormack Partners began as a small family firm, but have since grown to become a prominent organisation, recognised as the only recruitment consultancy partnering exclusively with roofing and cladding companies.

Managing Director of TSL Ltd, Dexter Copeland, said: "McCormack Partners have recently secured seven members of staff for our business and the candidates that were brought to interview stages far exceeded anything we had experienced before in previous recruitment attempts.

"I can't thank them enough for easing the pain of recruitment."

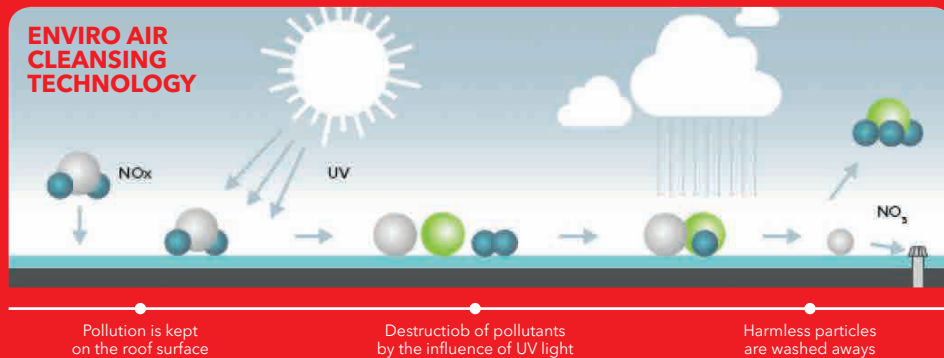

Send us an email if you need roofing recruitment help: [hello@mccormack-partners.com](mailto:hello@mccormack-partners.com)

# BUSY TIMES FOR TN INTERNATIONAL!

2021 has seen fantastic developments within **TN INTERNATIONAL**, one of the UK's leading manufacturers of roofing, waterproofing and insulation products.

The company has launched a number of new products, including DacoShield PU liquid waterproofing as well as its eco-friendly EnviroAir bituminous roofing membranes. These specially-formulated products utilise innovative titanium dioxide technology to actively reduce pollution by removing harmful nitrogen oxides (NOx) from the surrounding atmosphere.

It has also been a busy time for projects, with the Roofing Specification Team securing more business than ever before. These nationwide projects have been wide and varied, incorporating everything from Börner high performance BUFR systems to LOGICROOF Single Ply and DACOSHIELD Liquid Waterproofing.

A prime example is Chorlton High School in Manchester where over 3,000 m<sup>2</sup> of TNi's Torch Hybrid Roofing System was installed onto a prestigious new build development.

Elsewhere, TNi's state-of-the-art DACOSHIELD Pure Polyurea liquid waterproofing was specified to rejuvenate the roof of Arrowe

## ACO'S BLUE/GREEN ROOF DESIGN—CREATING SUSTAINABLE URBAN ENVIRONMENTS

**ACO is presenting an online continuing professional development (CPD) webinar on its new RoofBloxx rainwater attenuation system.**

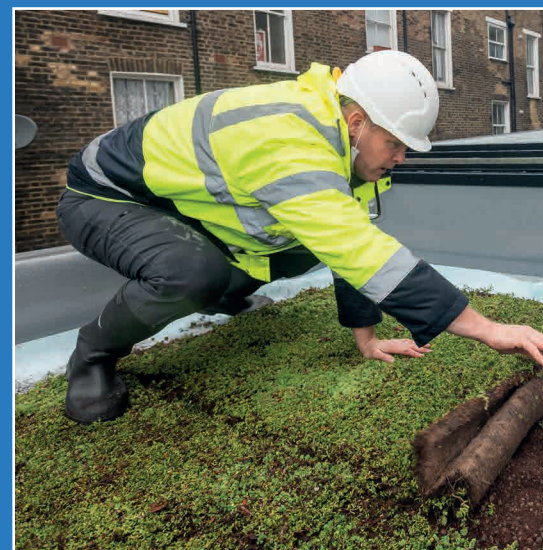

Designed specifically as a roof drainage layer for use on blue, green and blue/green roof applications to store rainwater at source and to control surface water run-off, ACO's patent-pending solution separates the competing drainage requirements by engineering an elevated structural attenuation system that operates independently of the flat roof drainage system, allowing both storm eventualities and systems to be engineered to known standards and best practice.

With the drive to mitigate the effects of climate change and deliver net-zero emissions, cities around the world are writing into their development plans the need for more sustainable construction methods.

This presentation will explain the role of blue/green roofs in the creation of sustainable urban environments and will cover key design considerations.

Tailored specifically for roofing contractors, architects, civil and building engineers, it will explain the pros and cons of different roof types and provide participants with a comprehensive understanding of key drainage design considerations.

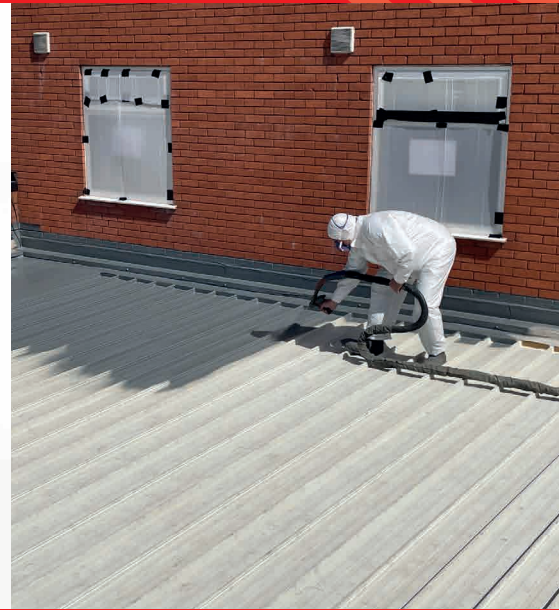

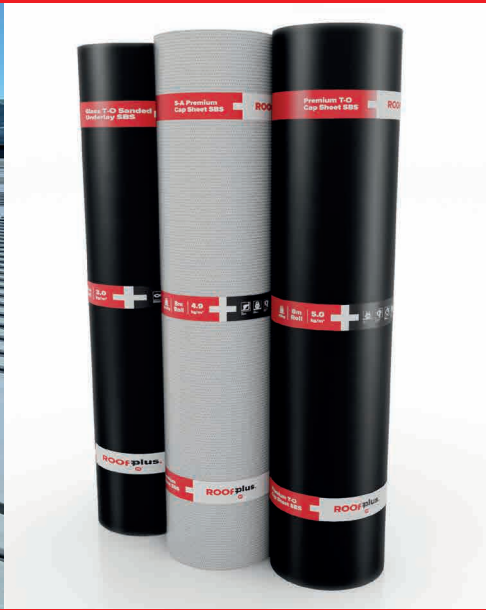

Delivered by ACO's in-house blue/green roof design expert—Neill Robinson-Welsh—the session will also cover the 'design dilemma' of how to design a blue/green roof that can meet the flat roof design standards under BS EN 12056-3:2000, while meeting planning conditions without compromising either requirement.

The event, which takes place on Thursday 23 September at 12.30 (BST), counts as one hour of CPD. You can register at <https://bit.ly/3ncsHvL>

Learn more about the ACO system at [www.aco.co.uk/blue\\_green\\_roofs](http://www.aco.co.uk/blue_green_roofs)

Park Hospital in Liverpool, and a LOGICROOF PVC Adhered System was chosen to protect the Edge House residential building in Malvern, Worcestershire.

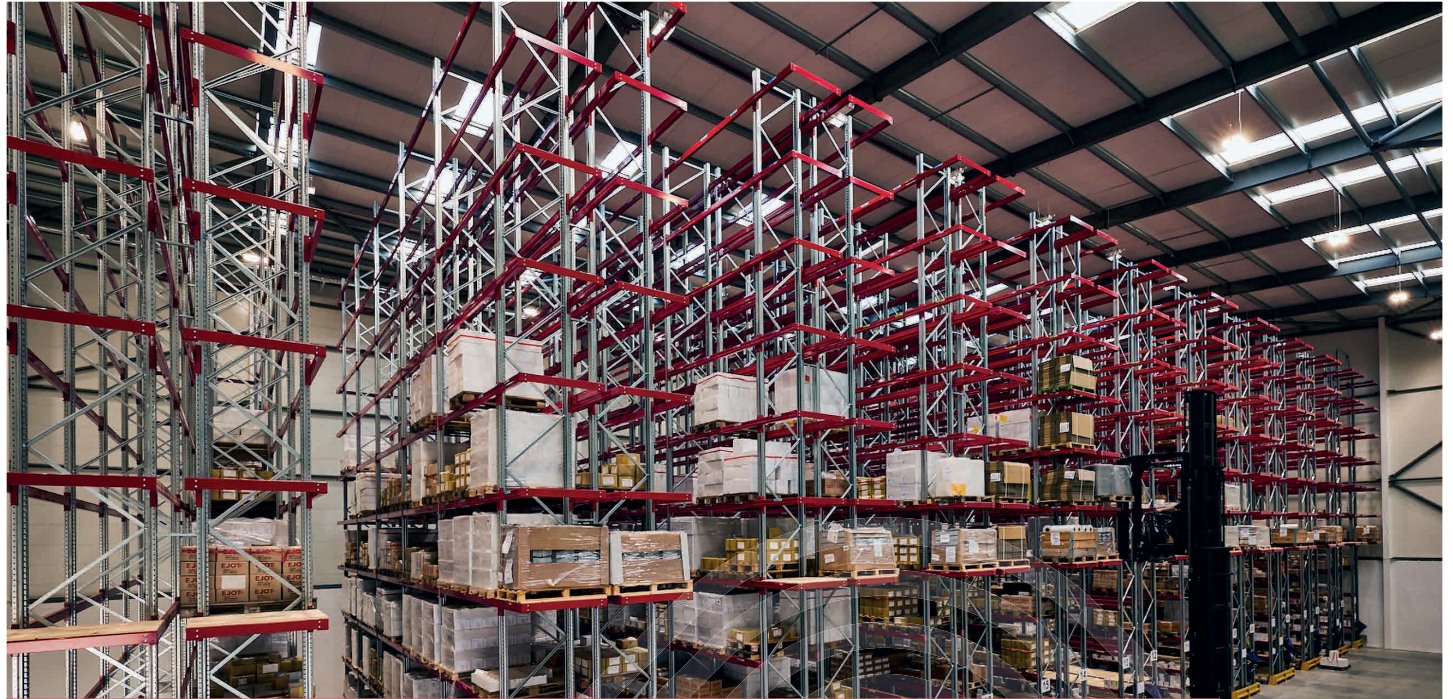

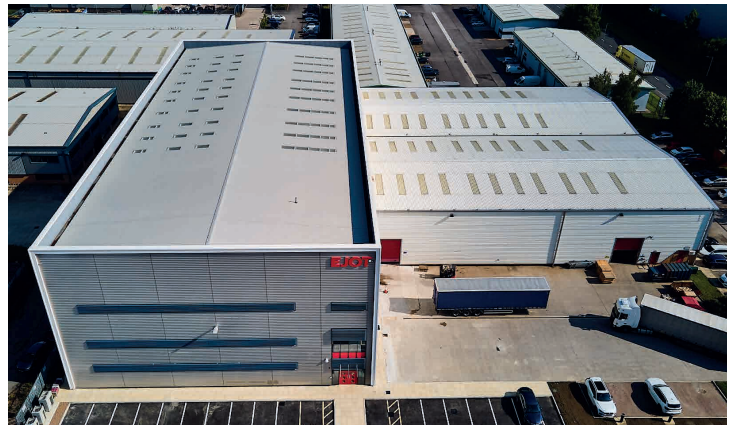

The company is also about to launch its brand-new roofing range specifically designed for specialist roofing merchants and distributors.

Incorporating a wide range of underlays and cap sheets, with SBS and APP options and a choice of weights and guarantees, ROOFplus is a range of high quality membranes offering a waterproofing solution for every roofing project.

Life has never been so exciting for the team at TN International with plenty more projects and initiatives still in the pipeline.

## FUTURE FOCUS FOR EJOT UK WITH MULTI-MILLION POUND EXPANSION PROGRAMME

**EJOT has invested significantly in its manufacturing capacity and technical support in a project which has more than doubled the size of its UK design, manufacturing and logistical facility near Leeds.**

The company has expanded its Sherburn-in-Elmet site to create a state-of-the-art facility tailored to the needs of the UK market, with class-leading support for customer innovation.

In addition to providing more than 4,500 m<sup>2</sup> of new manufacturing space and a logistical control centre that will increase storage capacity by 40 per cent, the expansion also includes a state-of-the-art upgrade to the EJOT Applitec centre—already unique in the industry.

Unlike any testing and research and development facility available here in the UK, this 'application technology' facility will be three times the size of the existing centre, providing a resource for multi-dimensional fastener testing and new product development in conjunction with OEMs.

The testing resources available here will include two new environmental testing laboratories where the long-term performance of EJOT products can be reliably assessed.

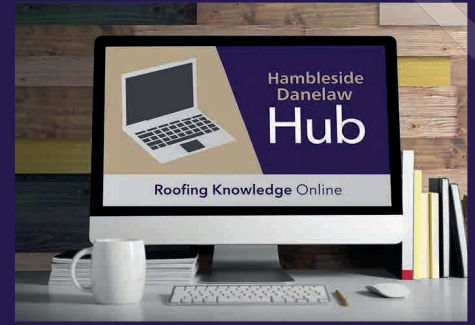

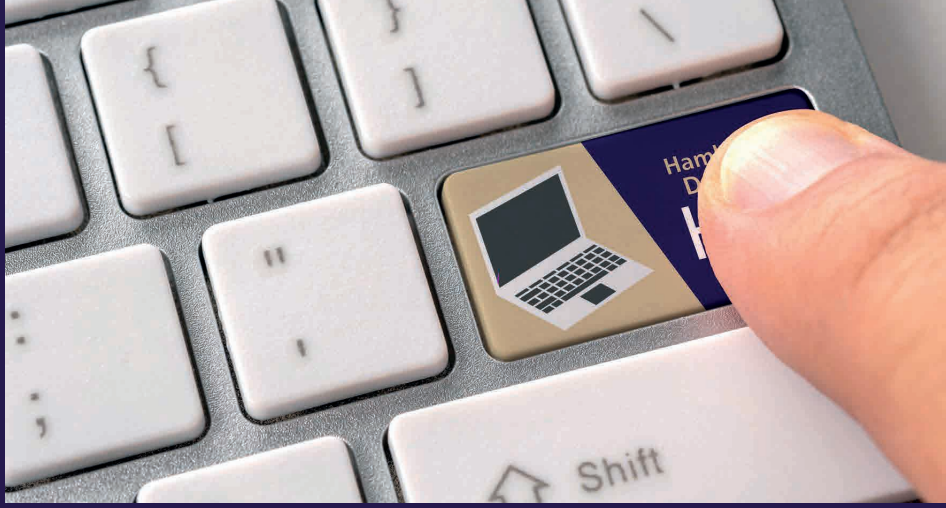

Robert Hardstaff, Managing Director at EJOT UK, said: *"Our ethos of 'converting customer problems into product solutions', both reactively and often proactively to prevent problems evolving in the first place, requires us to have the right technical resources and quality procedures in place to meet whatever challenges our customers face."*

*"Our new facilities will enable us to do this in a way that not only continues this level of support, but also reaffirms our unique positioning to the industries we now serve."*

To find out more please visit  
**[www.ejot.co.uk](http://www.ejot.co.uk) or call 01977 687040.**

# BACK TO SCHOOL WITH Hambleside Danelaw Hub

This is the announcement from Hambleside Danelaw, who are pleased to announce a new initiative to help fill the skills gap in roofing. Hambleside Danelaw Hub offers a centre of knowledge which can be completed anywhere with an internet connection.

## The only way is up

Learners can be allocated a space on one of its courses, and they will gain access to a wealth of materials that will teach or refresh their knowledge. Upon passing the course, learners will be able to download a certificate.

Hambleside Danelaw plans to release a variety of courses from all three of its divisions:

- Danelaw manufacture roofing and ventilation accessories.
- Dryseal produce a GRP waterproofing system for flat and low-pitched roofs.
- Zenon manufacture a range of GRP rooflights which can be used to light up commercial and industrial properties.

Whether you need to know the airflow of an eaves vent, or how Zenon rooflights let light in, Hambleside Danelaw Hub will offer the solution.

## What next?

Hambleside Danelaw Hub will be open to learners at the start of September 2021 and the full list of courses will be available in the next few weeks.

To register your interest in enrolling on any of the courses, please head to **[www.hambleside-danelaw.co.uk/hub-info](http://www.hambleside-danelaw.co.uk/hub-info)** or contact **[marketing@hambleside-danelaw.co.uk](mailto:marketing@hambleside-danelaw.co.uk)**.

# THE SEARCH FOR THE 2021 BMI APPRENTICE OF THE YEAR IS ON!

Following the lifting of Covid-19 restrictions, a key highlight in the UK construction calendar is back with the launch of the **BMI APPRENTICE OF THE YEAR 2021** competition—one of the leading apprenticeship events in the sector.

BMI actively supports colleges throughout the UK with their work training roofing apprentices and the contest seeks to find the UK's most promising apprentices and reward them for their commitment, ability and potential.

One of the leading apprenticeship events in the sector, it is the focus on

the business dimensions that makes the BMI Apprentice of the Year stand out from other competitions. Marketing, finance and presentation, for example, play an important role in a career in roofing, as well as purely the tradecraft element, although these vitally important skills are not overlooked during the two-day event.

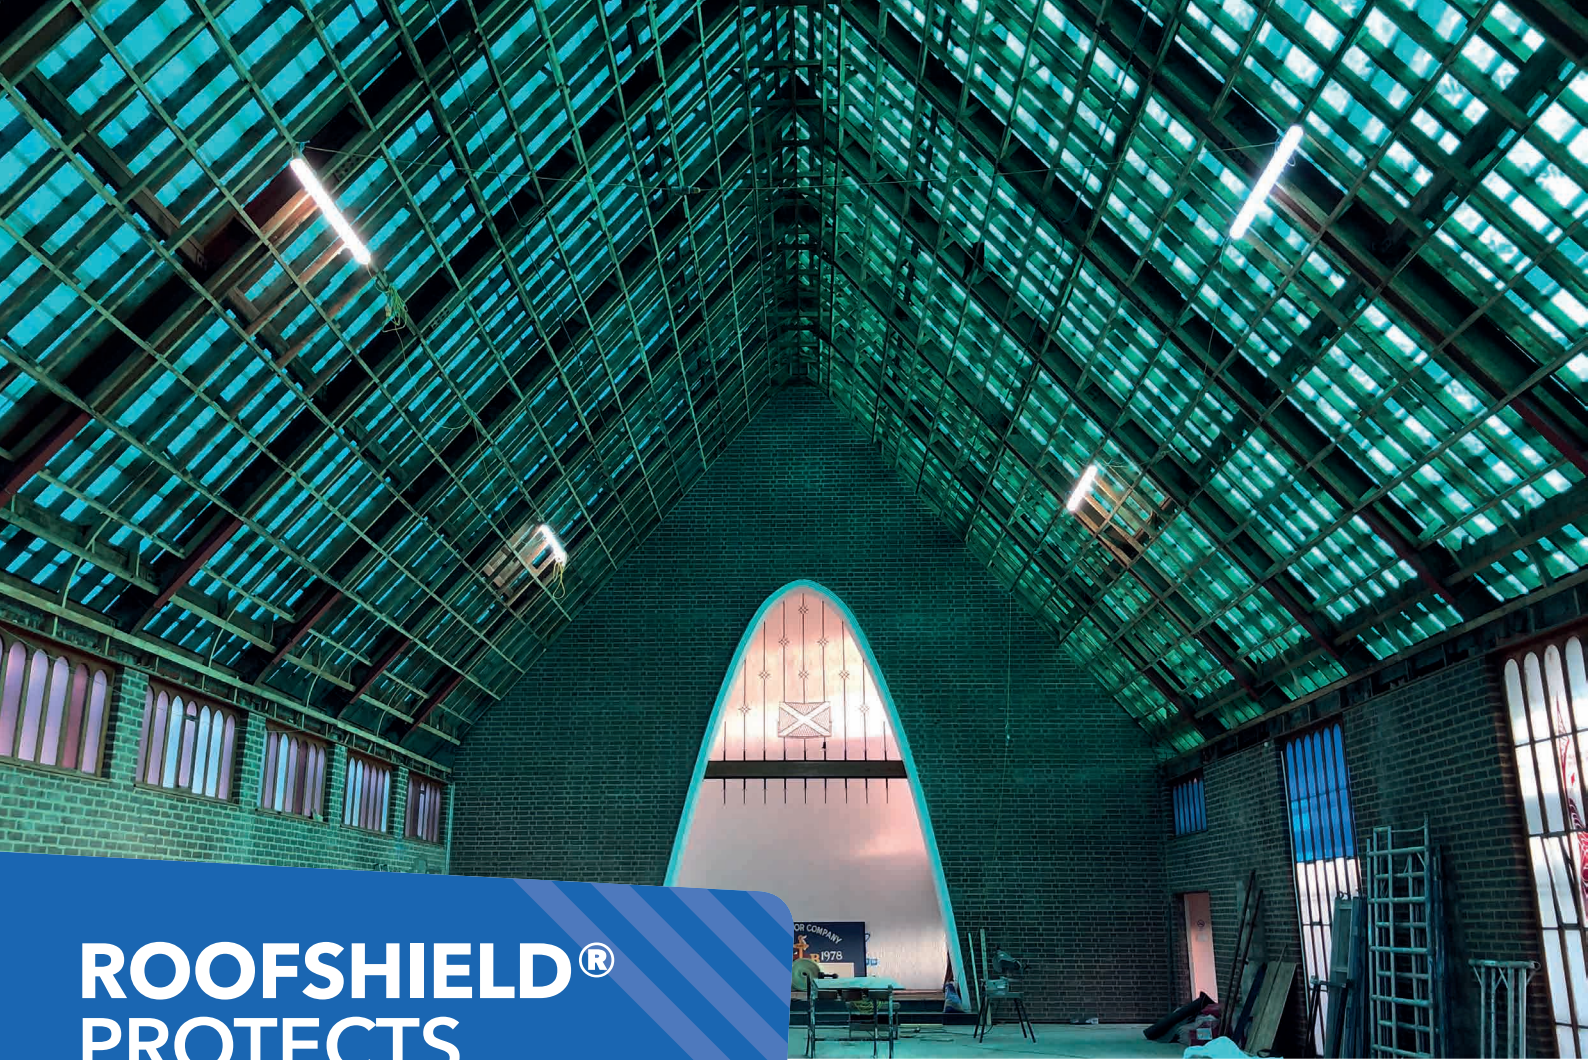

This year's competition opens on 1 September 2021 and welcomes all those recognised as an apprentice by their employer, or those working towards qualified status. Each year the competition picks a theme, which this year is 'influence', and BMI is looking for contestants who have what it takes to influence peers and those in the wider roofing community.

Closing date for entries is 1 October and entrants selected for the final, which takes place on the 17 and 18 November at the BMI Academy in Gloucestershire, will receive coaching on a range of topics including presentation skills, health and safety, estimating and making technical assessments.

For more information and to enter BMI Apprentice of the Year, please visit either **[redland.co.uk/young-roofers/apprentice-of-the-year-2021](http://redland.co.uk/young-roofers/apprentice-of-the-year-2021)** or **<https://bit.ly/3tmM3j5>**

# ROOFSHIELD® PROTECTS THE HERITAGE OF NORTHERN IRELAND CHURCH

The world-renowned Roofshield® membrane from the **A. PROCTOR GROUP** is now an integral part of protecting the heritage of St Andrew's Presbyterian Church, Bangor, and enabling it to continue serving the local community.

The current church building opened in 1957, and as part of a £10,000 Cornerstone grant, the redevelopment works at St Andrew's will include replacement of the roof, repairs to the heating system, and a building extension.

Architects Knox and Markwell, specialists in church design and conservation projects, will lead the project design. Specialist roofing contractor D Harkin & Co Roofing will carry out the roofing works.

D Harkin chose Roofshield® roofing membrane, which has long been recognised as one of the highest performing roofing membrane solutions, providing a pitched

roof underlay which is both air and vapour permeable.

The product's exceptional performance has proven itself in the most demanding locations around the world. In addition, its characteristics allow even very complex pitched roofs to breathe without the need for air gaps or secondary venting.

Incorporating Roofshield® into the roofing design can lead to savings in labour and material costs due to removing the need

for an additional VCL. The exceptional air permeability performance of Roofshield® means that the roof space will result in similar air changes to that of a roof using traditional eaves/ridge ventilation.

A unique performance characteristic of Roofshield® is its patented Spunbond Meltblown Spunbond (SMS) structure, which allows high levels of airflow and the transport of moisture vapour, making the formation of condensation in the roof space virtually impossible.

To find out more please visit  
[www.proctorgroup.com](http://www.proctorgroup.com).

# MARKET INSIGHTS DRIVE KLOBER'S RANGE EXTENSIONS

Based on customer insights and home improvement trends, a number of range extensions from KLOBER will offer distributors and contractors more choice.

While availability and price remain high on the agenda, contractors surveyed by Klover at the beginning of 2021 said they are driven by having a wide range of roofing products. With this in mind, Klover now offers a Secret Gutter, 6 m Dry Ridge Kit, and an updated three-in-one Eaves Ventilation Pack.

As loft conversions rank high in the top 20 value-adding home improvements, Klover anticipates more demand for suitable roofing products. Well-suited for dormer conversions, Klover's GRP Secret Gutter is a high-performance continuous abutment soaker typically used with flat interlocking tiles, which provides a secondary line of defence against wind-driven rain.

With weather conditions continuing to compromise traditional methods of fixing ridge and hip tiles, sales of dry ridge systems are sustained. As such, the entry level 6 m Dry Ridge Kit has been brought to market and is well-suited to clay and concrete applications.

Finally, in response to demand for easy-to-install solutions, Klover offers more sizes of its three-in-one Eaves Vent Pack. This option provides the fascia vent, felt support tray, and roll-out rafter tray, all in one pack.

Pauline Manley, Marketing Director at Klover, said: *"Customer insights help us to continue investing in the solutions that are going to make their lives easier. All three of these range extensions answer a specific customer challenge or industry trend and we've got more to follow."*

For more information please visit [www.klover.co.uk](http://www.klover.co.uk).

# KEYLITE ROOF WINDOWS SUPPORTS TRADES WITH ONLINE PRODUCT TRAINING

**KEYLITE'S** Brand Development Team are offering group and one-on-one online training sessions tailored for installers, merchants, universities and colleges, as well as end-users and self-builders.

The online sessions have been designed to be concise, informative and interactive, demonstrating just why Keylite is the UK's

leading innovative roof window manufacturer and explaining how to make the most out of the brand's many unique product features.

The training includes a short introduction by a member of Keylite's Brand Development Team, which will cover the brand's awards and achievements before going on to detail Keylite's product range.

The host outlines which roof windows work best in certain environments, the benefits of each product, and what trends Keylite is seeing across all sectors.

Keylite understands that training is vital to trades, which is why it has always been renowned for its product demonstrations—with merchants, installers and students alike being able to make the most of its in-factory training facilities.

## CUPA PIZARRAS has been awarded Roofing Supplier of the Year at the Homebuilding & Renovating Industry Awards 2021.

The company's sustainable and innovative portfolio of natural slate, as well as its excellent service and support, were both instrumental in its success.

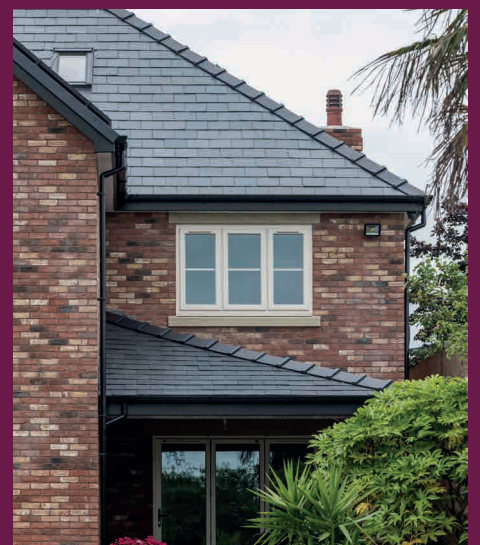

The standard of the products and services offered by CUPA PIZARRAS was initially recognised by the awards panel and attained a place on the shortlist, before winning the necessary number of public votes to win the title.

CUPA PIZARRAS supplies one out of every two natural roofing slates around the world. A completely natural material, the slate undergoes a careful extraction process, before being passed through a processing plant, which combines modern technology with traditionally skilled crafts people.

The product is also regularly examined by external authorities certifying that the slate meets various national and continental standards.

# CUPA PIZARRAS IS VOTED ROOFING

Online demonstrations provide the opportunity to bring a variety of audiences from the supply chain together, therefore opening up a greater level of interaction through summaries and post-training discussions that can take place via video calls and email.

For more information on Keylite roof windows and its online product demonstrations, please visit [keyliteacademy.com/book-demo-day/](http://keyliteacademy.com/book-demo-day/), call 01283 200158 or email [info@keyliteuk.com](mailto:info@keyliteuk.com).

Keylite is passionate about education at every stage—as the construction industry is constantly evolving, so do the products and methodologies within it, meaning there is always a need for training.

# SUPPLIER OF THE YEAR

Pursuing methods which avoid environmental damage has been consistently prioritised by CUPA PIZARRAS. Although natural slate is already an ecological choice, the company has invested heavily to reduce its energy consumption and CO2 emissions. As such, and according to the Carbon Trust, CUPA PIZARRAS is now the first in the slate industry to be a carbon-neutral company.

Furthermore, the business utilises an innovative traceability system, enabling distributors and customers to discover specific information about all products in real time, even down to details of the hand splitter that worked on that particular batch.

To find out more about CUPA PIZARRAS products please visit [www.cupapizarras.com/uk](http://www.cupapizarras.com/uk).

## ROOFING AWARDS 2021

UK ROOFING AWARDS 2021

NFRC

### BOOK NOW TO AVOID DISAPPOINTMENT

Make sure you book your ticket or table for the UK Roofing Awards 2021, if you haven't already, as we are selling out fast.

The UK Roofing Awards, taking place on 5 November 2021 at The Intercontinental London—at the O2, is expected to be a sell-out event. It will be the first UK Roofing Awards live event since 2019, as the 2020 event wasn't able to go ahead due to Covid-19 restrictions. As well as a chance to celebrate all that our industry has achieved in the last two years, despite the challenges faced, it will also be an opportunity to catch-up with industry colleagues.

To book your ticket or table, please visit: [www.nfrc.co.uk/uk-roofing-awards/attend](http://www.nfrc.co.uk/uk-roofing-awards/attend)
