UK ROOFING AWARDS 2024 SHORTLIST ANNOUNCED

UK ROOFING AWARDS 2024

FINALIST

NFRC

FOLLOWING A THOROUGH JUDGING PROCESS, THE SHORTLISTED PROJECTS FOR THE 2024 UK ROOFING AWARDS HAVE NOW BEEN FINALISED.

Tickets to attend the awards ceremony are selling fast, so get your tickets quick: <https://bit.ly/RA2024tix>

WINNER OF THE 2023 'ROOF OF THE YEAR' - Stuart Wheeler Roofing Ltd for Yellowsands.

THE SHORTLIST FOR THE 2024 AWARDS IS AS FOLLOWS:

BITUMINOUS HOT APPLIED LIQUID WATERPROOFING—sponsored by Carlisle Construction Materials Ltd

Rhodes House—**Fenland Flat Roofing Ltd**, working with Sika Ltd

8 Bishopsgate—**Lindner Prater Ltd**

The Residences, Birmingham—**MAC Roofing & Contracting Ltd**, working with Alumasc Building Products Ltd

Plot 7 Perry Barr Residential Scheme—**BriggsAmasco Ltd**, working with IKO PLC

COLD APPLIED LIQUID WATERPROOFING

1-7 Burnt Mill, Harlow—**Contour Roofing Ltd**, working with Sika Ltd

Emirates Stadium—**Topek Southern Ltd**, working with Triflex (UK) Ltd

Park Avenue Place at Neptune Wharf—**T & T Roofing Ltd**, working with Carlisle Construction Materials (CCM) Ltd

Sir John Moore Barracks, Shorncliffe Army Camp—**Alpha Specialist Roofing Ltd**, working with Polyroof Products Ltd

FULLY-SUPPORTED METAL

Noah's Ark—**Kingsley Hard Metals Ltd**

Fold—**Install Zinc Ltd**

Renshaw Hall, Liverpool—**Just Hard Metals Ltd**

Tidworth-Copper dome—**Prestige Metal Roofing Ltd**

GREEN ROOFING—Sponsored by Bauder Ltd

Stour Road, Hackney—**Roofworx (UK) Ltd**

The Compass School—**Pritchard & Pritchard Ltd**

Old Street Station—**Eco Green Group**

NDEC, Ebbw Vale—**J Randall Roofing Contractors Ltd**

HERITAGE ROOFING—sponsored by Glidevale Protect

Diss Cemetery Chapel—**M&J Group (Construction & Roofing) Ltd**

East Manley Hall—**Emerton Roofing (Western) Ltd**

Mill House—**R.L.Lovatt Ltd**

Lancarrife House, Bodmin—**Marnick Roofing Ltd**

LEADWORK

Fettes College Cricket Pavilion—**Edinburgh Leadcraft Ltd**

35 Lamb's Conduit Street—**Fraden Contracts Ltd**

Prince Rock Primary School—**Stormforce Roofing and Maintenance Ltd**

Derby Museum Clock Tower—**NRA Roofing & Flooring Services Ltd**

MASTIC ASPHALT—sponsored by Mastic Asphalt Council (MAC)

Sumburgh Head Lighthouse & Visitors Centre—**BriggsAmasco Ltd (Glasgow)**

Derby Museum and Art Gallery—**NRA Roofing & Flooring Services Ltd**

Dover Castle—**James Roofing Ltd**

Ollerton Green—**Impact Roofing and Building Ltd**

MULTI-DISCIPLINE PROJECT >£250K

Lucent W1—**EJ Roberts Roofing Ltd**

Northgate Yard—**Progressive Systems Ltd**

Hounds Hill Shopping Centre, Blackpool—**Longworth Building Services Ltd**

Aintree Hospital A&E Extension—**Longworth Building Services Ltd**

RAINSCREEN FAÇADES

Aurora Apartments—**North East Contracts Ltd**

Templemore Baths, Belfast—**Thornton Roofing (Ireland) Ltd**

Molecular Science Building, University of Birmingham—**Advanced Roofing & Cladding**

Arden Square, Crewe—**Longworth Building Services Ltd**

REINFORCED BITUMEN MEMBRANES—sponsored by Sika Ltd

English Martyrs School—**Roofclad Systems**

Lloyd's of London—**Inspire Contract Services Ltd**, working with Bauder (UK) Ltd

St Barnabas House—**Clarke Roofing Southern Ltd**

Newham College—**Infalible Systems Ltd**

ROOF SLATING—sponsored by CUPA PIZARRAS

Mosspark House—**Ferguson Kellock Ltd**, working with CUPA PIZARRAS

The Tors, Lynnmouth—**Western Counties Roofing Ltd**

Old Acres—**MTH Roofing and Building Services Ltd**

The Roundhouse, Leeds—**Martin-Brooks (Roofing Specialists) Ltd**

ROOF TILING—sponsored by Marley Ltd

All Saints Church Fleet—**Fildes Roofing Ltd**

Olive Cottage—**Emerton Roofing (Western) Ltd**

Heatherfield—**Clarke Roofing Southern Ltd**

Whites Close—**Mid Cornwall Roofing Contractors Ltd**

SHEETING AND CLADDING—sponsored by Euroclad Group Ltd

QPR Training Ground—**Malone Roofing (Newbury) Ltd**

Aviva Studios (Factory International)—**Lindner Prater Ltd**

Slough EfW Multifuel Powerplant—**MAC Roofing & Contracting Ltd**, working with Euroclad Group Ltd

Hydebank, DVA Test Centre—**Thornton Roofing (Ireland) Ltd**

SINGLE PLY ROOFING

Emmanuel Church—**Invictus Roofing Ltd**

Bellingham Commercial—**Invictus Roofing Ltd**

North Street, Reading—**Malone Roofing (Newbury) Ltd**

Bradford Market—**NRA Roofing & Flooring Services Ltd**, working with BMI (UK & Ireland)

SMALL SCALE PROJECT <£25K

Alturus—**Invictus Roofing Ltd**

Barney's Ruins—**Thornton Roofing (Ireland) Ltd**

St Andrews Bell Tower—**Matt Timby Ltd**

Newtons Primary School—**Ashe Roofing Ltd**

SOLAR ROOFING—sponsored by Sandtoft

DLS Synchrotron—**MAC Roofing & Contracting Ltd**

New County Hall—**M&J Group (Construction & Roofing) Ltd**

Red Rock—**R.L.Lovatt Ltd**

36 King Street, Covent Garden—**Maguire Brothers**

Flat out,

one of the best insulation solutions for flat roofs

Powerdeck U

A PIR insulation board for use in warm flat roofs with bituminous torch-on felt waterproofing systems.

Powerdeck F

Suitable for use in built-up felt, mastic asphalt and single-ply membrane waterproofing systems.

Eurothane Eurodeck

A thermal insulation board for use in warm flat roofs under mechanically fixed single-ply membrane waterproofing systems.

ROBERTS GROUP ANNOUNCES NEW MANAGING DIRECTOR

In an exciting start to 2024, the **ROBERTS GROUP**, which includes industry-leaders Polyroof, Restec, and Resology, has proudly announced the appointment of Patrick Roberts as Group Managing Director.

In this role, Patrick will spearhead the group's strategic vision and operational excellence, ushering in a new era of growth and innovation.

Patrick Roberts, a third-generation member of the Roberts family, brings a wealth of experience and a deep understanding of the organisation's values. His advancement signifies a pivotal moment in the family business's

evolution, with a commitment to maintaining its roots and core principles while embracing professional growth and global expansion.

Nick Roberts, representing the second generation of the Roberts family, will take on the role of CEO alongside the company's Chairman, David Roberts. Together they boast an impressive, combined tenure of nearly 70 years at the helm and have played instrumental roles in shaping the Roberts Group into an industry leader.

This transition reflects their strategic move towards trustee and supervisory roles, allowing them to contribute their expertise to the broader strategic direction of the group.

Patrick Roberts said: *"The legacy of the Roberts Group is a testament to the leadership of David and Nick Roberts over the past four decades.*

"Their dedication, vision, and unwavering commitment to excellence have laid a strong foundation for not only our continued success, but the liquid roofing industry as a whole.

"I am honoured to build upon their achievements and lead the group into the future."

For more information on the Roberts Group please visit www.robertsmanufacturing.co.uk.

WATERPROOFING PERFORMANCE FROM ARBOFLEX® PU FOR GREENER CITY LIVING

The ARBOFLEX® PU liquid applied waterproofing system from **CARLISLE CONSTRUCTION MATERIALS** has been used for a residential development from Galliard Homes in Neptune Wharf.

The site at Park Avenue Place consists of roofs, balconies and a landscaped podium deck in nine apartment blocks.

Delivered by T & T Roofing Limited, the project leveraged the ease and speed of installation benefits of ARBOFLEX® PU: a single component liquid applied waterproofing system with proven root resistance.

The liquid applied waterproofing system was installed as part of a complete roof build-up supplied by Carlisle, including an ALUTRIX® vapour control layer, tapered fire-retardant ROCKWOOL Multi-fix insulation, and the ARBOFLEX® Liquid Carrier Membrane.

The ARBOFLEX® PU system was rolled onto the roof surface, and the system's glass fibre membrane was laid onto the wet roof covering. A clean roller was then used to draw the liquid through the mesh, providing a quality assurance check. The mesh is submerged by the liquid waterproofing to a minimum thickness of 1.5 mm, providing a

seamless surface once the system has cured. The UV-resistant top coat can then be applied to achieve the BBA-accredited 20-year warranty, as it was for this project.

For the upstands, parapet walls and vertical surfaces of the planters in the communal outdoor areas, the ARBOFLEX® Thickener was added to the ARBOFLEX® PU system, providing thixotropic properties to ensure excellent coverage for the vertical surfaces.

Carlisle is Europe's leading manufacturer of roofing and façade systems, including EPDM, TPO and liquid waterproofing.

For more information please visit www.ccm-europe.com.

NFRC WELCOMES HARROWDEN TO ITS MEMBER LIST

HARROWDEN is delighted to announce its membership of **NFRC**.

With the growing emphasis on sustainable construction and the impending mandatory requirement for biodiversity net-gain measures for many developments, the green roof sector is experiencing significant expansion and is poised for continued growth.

As one of the leading growers and suppliers of the living components for green roof systems in the UK, Harrowden is ideally positioned to assist roofing contractors, whether they are experienced installers or exploring this area as a new business opportunity.

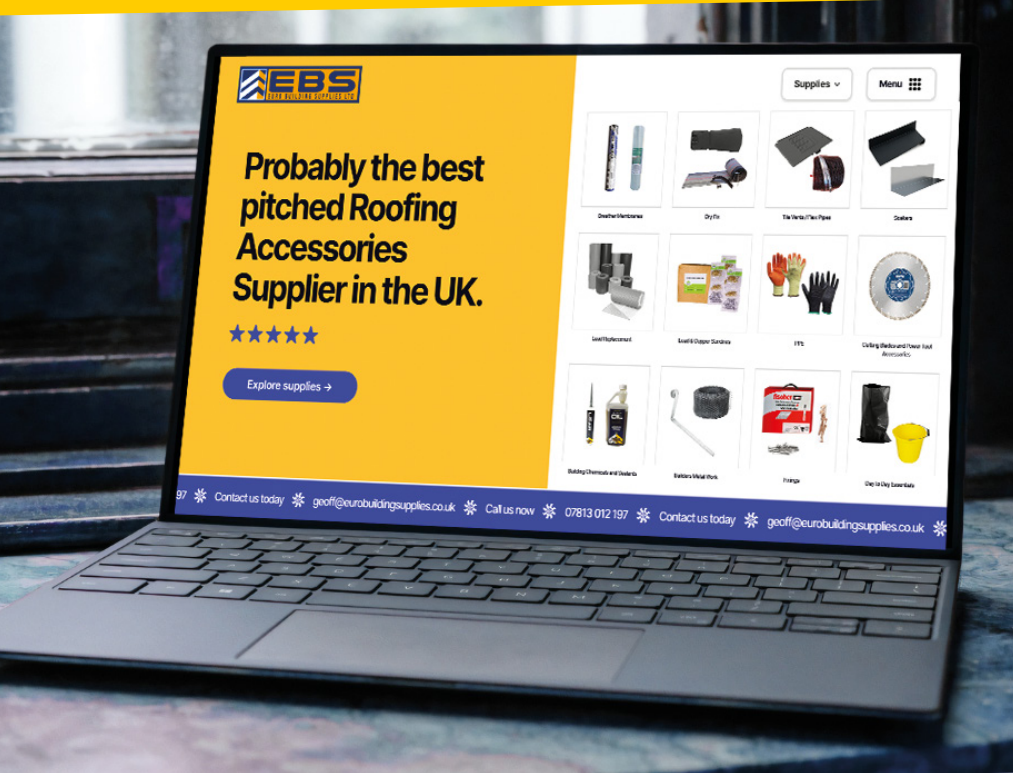

Harrowden is a one-stop shop for all the necessary elements for constructing a green roof above the waterproofing layer. Its diverse range of sedum and wildflower roll-out blankets, trays, plug plants, and various substrates meet a wide array of specifications. Additionally, for contractors venturing into green roofing for the first time, Harrowden conducts accredited CPD technical training courses for sedum green roofs and wildflower turf.

For more information and advice, please call **01832 777100** or email sales@harrowdenturf.co.uk.

Harrowden takes pride in the quality of its products and customer service, having achieved a comprehensive set of ISO accreditations, including ISO 9001, 14001, and 45001, and operates its own FORS Silver certified fleet.

Looking ahead, Harrowden is keen to raise awareness of green roofs within the wider roofing contractor community.

EURO BUILDING SUPPLIES—PROBABLY THE BEST PITCHED ROOFING ACCESSORIES SUPPLIER IN THE UK

EURO BUILDING SUPPLIES is proud to align itself with NFRC and its focus to promote the highest-quality products.

With over 30 years of experience, Euro Building Supplies imports and distributes a full range of pitched roofing membranes. In addition to its best-selling dry-fix Ridge Kit, it has a plethora of essential products and accessories for customers to choose from.

These include all dry fix tile vents, adapters and flexi-pipes, plastic and aluminium soakers, a full range of fixings, sealants, PPE, all 3 m dry valleys, lead replacement, diamond blades, and a range of general consumables.

It prides itself in quality, consistency, and an unbeatable world-class service. Its team of highly-skilled and knowledgeable staff is on hand to offer expert advice and support, every step of the way.

PASLODE FOR ROOFERS—THEY'VE GOT YOU COVERED

PASLODE has a reputation for delivering best-in-class nailing systems, revolutionising construction methods and reducing labour time while increasing product reliability and on-site safety.

When completing your roofing projects, there's a selection of tools and fixings to make your job quicker and easier without compromising on quality, providing solutions for a range of different roofing applications.

THE 360XI FOR BATTENING

When laying roof battening, boarding and flat roofing, the Paslode 360Xi framing nailer provides the perfect fixing solution. The tool boasts an unbeatable power-to-weight ratio, promoting all-day productivity.

BS5534-COMPLIANT—PASLODE NAILS HAVE YOU COVERED

The 63 x 3.1 Paslode nail for both the IM350 and 360Xi systems are tested and proven to equal or better the performance requirement set out in BS5534. For Paslode, it's not just about what's on the outside—it's what's on the inside that counts! And you can trust the quality of the 63 x 3.1 Paslode fixing to meet your roofing requirements.

FOR METAL ROOFING—THE IM45 GN COIL NAILER

When fixing metal roofing, the IM45 cordless coil nailer has been proven to increase productivity on-site by as much as 40%, saving you precious time and money in comparison to traditional hand-nailing methods.

NEW FOR 2024—MEET THE PASLODE ROOFING TEAM

Paslode has increased its focus and commitment to the roofing market by having a dedicated team working closely with key industry partners to provide the best product, service and knowledge.

FIXING ROOF BATTENS?

ONDULINE PROVIDES IDEAL SOLUTION FOR SUPERMARKET CHAIN

One of the leading principal contractors in the north of England successfully executed a critical roof refurbishment project for a prominent supermarket chain at its Batley store in west Yorkshire.

Faced with persistent leaks from aging bituminous felt and broken tiles affecting the 15,000 m² roof, the contractor aimed to complete the project swiftly while ensuring uninterrupted store operations.

A spokesperson said: *"One of the key criteria of the project was ensuring the supermarket could operate as normal, so it was vitally important that we minimised noise, dust, and other disturbances that could potentially impact customer experience and employee productivity."*

To address this, the contractor selected **ONDULINE's** ISOLINE® LOW LINE sub-roof system. Unlike traditional methods, ISOLINE allowed the retention of existing felt and baton, eliminating the need for store closures. The phased installation approach ensured protection from adverse weather overnight.

BRE-tested and BBA-accredited, ISOLINE® LOW LINE offers a 30-year guarantee and is designed for low-pitch roofs. Acting as the primary waterproofing layer, it facilitates a lower roof pitch than tile manufacturers recommend. Its corrugations enhance ventilation and moisture control, making it a practical solution.

The contractor praised the system's instrumental role in overcoming challenges, citing the innovative design and support from Onduline's Technical Team. The positive feedback from the supermarket underscored the success of the refurbishment, highlighting adherence to timelines, methodology, and the crucial aspect of maintaining store functionality.

The ISOLINE® LOW LINE system's success now serves as a blueprint for future projects with similar requirements.

For more information on Onduline's ISOLINE® LOW LINE roofing system, please visit www.onduline.co.uk.

BBA CERTIFICATION FOR MAPEI PURTOP 1000N

MAPEI PURTOP 1000N liquid roof waterproofing system has been awarded BBA Certification. A two-component solvent-free, fast-curing pure polyurea membrane, Purtop 1000N forms a waterproof coating for roofs, podium decks and storage tanks.

Purtop 1000N was assessed as a waterproofing layer on pitched and flat roofs, with pedestrian and limited access, including green roofs and roof gardens, and fulfilled all requirements.

Key factors tested included fire safety, hygiene, health and the environment—including water-tightness, resistance to mechanical damage, root penetration, slip resistance and durability. It was also assessed for design, installation, workmanship maintenance and repair, manufacture, delivery and site handling.

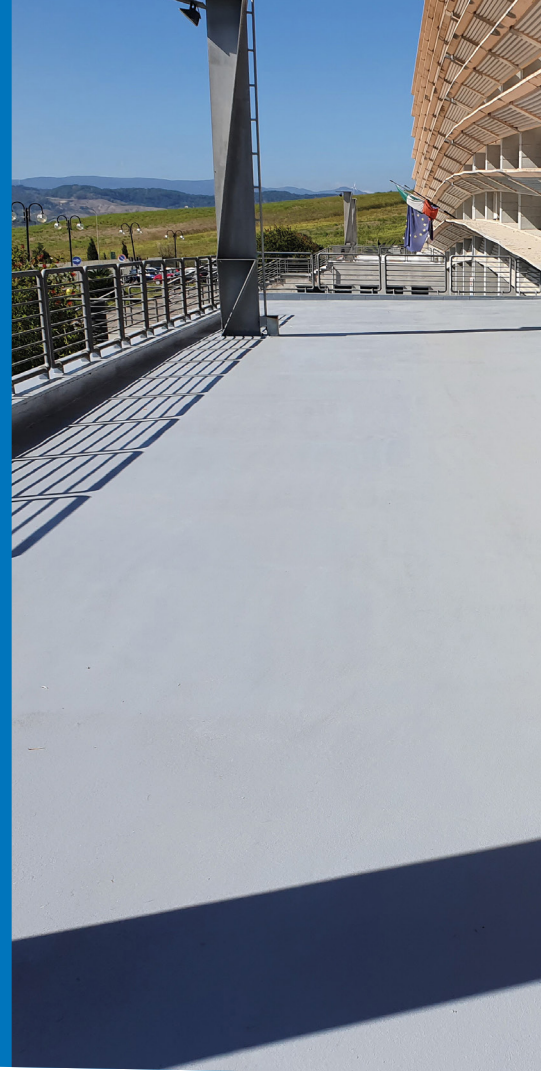

The BBA Certificate 23/7057 confirms that Purtop 1000N achieves a classification of BROOF (t4) under BS EN 13501-5 : 2005 and has a service life of at least 25 years. Purtop

1000N also has WRAS approval, making it suitable for use in contact with potable water.

Applied by spray with a high-pressure, bi-mixer-type pump, Purtop 1000N is immediately waterproof and set to light foot traffic, creating a strong, flexible membrane on new and existing surfaces, including concrete and metal. The coating has exceptional tensile and tear strength, high crack-bridging capacity—both static and dynamic—and elongation capacity. It also provides excellent resistance to alkalis and diluted acids.

No reinforcement is required, it does not form overloads on load-bearing structures and, after reticulation, the coating is completely inert. Purtop 1000N is also compliant with ETAG 005 (*"Liquid applied roof waterproofing kit"*) and suitable for contact with drinking water in accordance with Italian Ministerial Decree DM 174/04.

For more information please contact info@mapei.co.uk or visit www.mapei.co.uk.

ACTIS: WITH 2024 POISED TO BREAK HEAT RECORDS, KEEPING HOMES COOL IS VITAL

With climate scientists predicting that this year could be even hotter than record-breaking 2023, ensuring our homes stay cool is essential for our health and comfort, says insulation specialist ACTIS.

The Met Office has named 2022 as the hottest year in the UK since records began, with 2023 the warmest globally, according to the EU's Copernicus Climate Change Service.

The Met Office and experts from US science organisation, Berkeley Earth, believe 2024 could be even hotter.

The latest reports follow one from Oxford University stating that the UK is *'dangerously unprepared'* for the impact of rising temperatures and calls for sustainable adaptations to the built environment.

Actis UK and Ireland Sales Director, Mark Cooper, said: *"The main purpose for insulation has, until recently, purely been to keep homes warm. But staying cool to reduce the uncomfortable and even dangerous effects of heat on the human body while indoors is increasingly important.*

"Energy-guzzling air conditioning systems are not the answer. That lies in addressing the building fabric. While some insulation products can make homes unbearably hot in the summer, reflective alternatives also act as coolants."

Part O of the building regulations obliges architects to limit unwanted solar gains and provide a way to remove heat from residential dwellings.

Mark added: *"Using Actis insulation and membranes can make a dramatic impact. Our two-in-one Eolis HC, a reflective insulation with an integrated vapour barrier, reflects 95% of infrared radiation and the Hybrid range has an important role to play in helping buildings stay cool."*

For more information please visit www.insulation-actis.com.

Actis' Hybrid range and its Eolis HC can help keep homes cool, as climate scientists predict 2024 could be even hotter than last year's record-breaking worldwide temperatures.

CENTAUR PLAYS MAJOR PART IN RAILWAY STATION REBUILD

One of the north's important railway stations was built in 1867 and redeveloped in 2011 at an estimated cost of £2,000,000.

The ticket office underwent a major rebuild with a view to helping the local economy and modernising the facility, while ensuring the aesthetics were in line with the historic route of the building.

Unfortunately, several years later, this station had reports of leaks across various walkways and podiums into the sub-level below. A versatile approach was required to ensure the works could be conducted swiftly and safely while maintaining the original project.

THE CHALLENGE:

Safety and speed are a necessity on all projects; however, when working on access routes in close proximity to the public, ultra-low odour is also paramount. Several walkways and plinths required urgent refurbishment with minimal disruption to service, calling for a cold applied, ultra-low odour, non-hazardous membrane to be utilised.

THE SOLUTION:

Local contractors were originally looking at an old PMMA system but required a safer alternative and approached **CENTAUR TECHNOLOGIES** for its innovative products and unrivalled devotion to installer and public wellbeing.

Centech APA was utilised, as the quick cure, hard-wearing product allowed for the complete system to be installed and trafficable within the expedited time frame.

The Centech APA, like all of Centaur's waterproofing products, is ultra-low-odour, non-flammable and free from the harmful materials found in the balcony waterproofing products, making it the safest liquid membrane to install on the market today.

For further information please visit www.centaurroofing.co.uk.

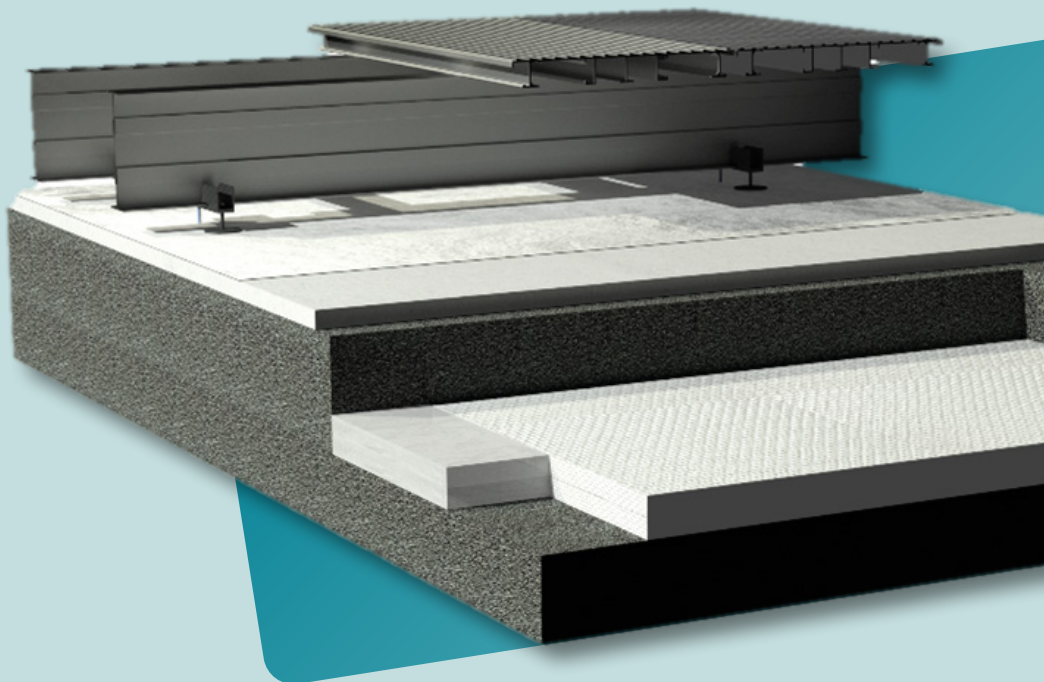

CTF INSULATION—SECOND TO NONE FOR ALL ROOFING INSULATION REQUIREMENTS

CTF INSULATION is a leading independent tapered insulation design and supply specialist within the flat roofing industry.

It offers a range of unique and advanced insulation systems which provide a solution to all roofing insulation requirements. CTF prioritises scrupulous compliance with building regulations, U value calculations, Roof (t4) and BS 6229. It ensures its leading position by staying versed with industry and market changes.

With its diverse product systems, CTF Insulation can accommodate and design all types of roof insulations, from warm and inverted to flat and tapered roofs. It has responded to the significant changes in the market's desire for non-combustible insulation products.

Its latest product solution is the CTF-Ultra VIP- A2 systems: an insulation system build-up which is composed of non-combustible (A1 or A2) fire-rated products, providing a complete non-combustible insulation system.

Other non-combustible products include CTF-05: Stone Wool, CTF-10/CTF-IV3: Cellular Glass, CTF-FS (fire safety boards) and CTF-UB (upstand boards).

CTF's highly-specialised technical designers and estimators take great pride in their work and continuously strive for attention to detail.

TAPEREDPLUS AMONG FIRST IN UK'S ROOFING SECTOR TO BECOME B CORP CERTIFIED

TAPEREDPLUS has achieved the globally recognised B Corp accreditation as it works to design and supply flat roofing and insulation systems that optimise the energy efficiency of buildings.

Similar to Fair Trade, B Corp acknowledges TaperedPlus's commitment to using business as a positive force by making decisions that serve communities, consumers, employees and the environment.

The Stockton-on-Tees headquartered business, which has a technical design studio in Wolverhampton, underwent a rigorous assessment to ensure it meets the highest standard of social and environmental performance, public transparency, and legal accountability.

A national leader in the design and supply of flat roofing and other insulation systems across

residential, commercial, and industrial sectors, TaperedPlus already holds the ISO9001 quality management accreditation.

The independent company is experiencing increased demand for insulation due to spiralling energy costs combined with moves to upgrade older structures to non-combustible materials.

It recently launched a solution for a specific problem within the construction industry by developing ROCKdeck, a non-combustible insulation system capable of increased point load performance.

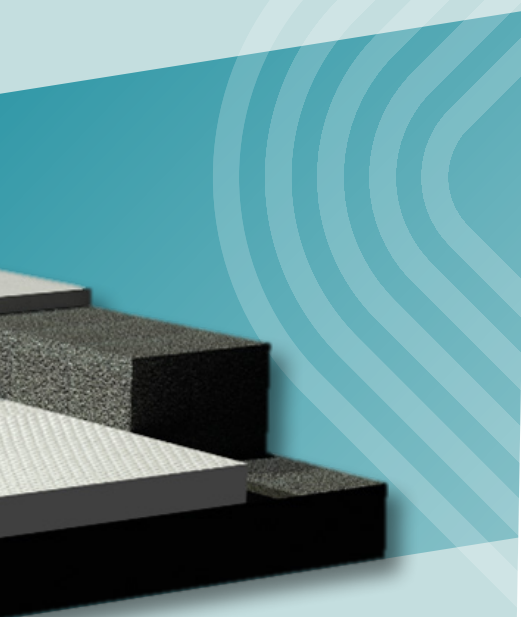

CEO Aman Chahal said: *"B Corp accreditation not only represents a milestone for TaperedPlus, but it's a testament to our commitment to creating positive changes as a business. We are one of the first companies within the*

roofing industry to become certified and hope that others in the wider construction sector will follow our example.

"We believe in the power of sustainable practices and responsible business, and this accreditation reaffirms

For more information please visit
www.ctfinsulation.co.uk.

Their unrivalled technical expertise and knowledge allows them to meet and exceed clients' requirements and expectations, which include a dedicated technical designer for the entirety of their project and a seamless and efficient service, from initial enquiry to project completion.

TaperedPlus is a national leader in providing quality flat roof design and building services.

Aman Chahal, CEO of TaperedPlus, which has achieved the globally recognised B Corp accreditation.

our dedication to shaping a future where environmental consciousness and ethical values lead the way."

For more information visit
www.taperedplus.co.uk.

THREE TIMES FASTER FLASHING WITH NEW UBIFLEX FINIO

UBIFLEX is well known for providing an alternative to lead flashing through its unique double bonding, instant waterproofing solutions.

And with new product, Ubiflex Finio, you can now achieve a quality, watertight flashing solution up to three times faster. It is lightweight and malleable, allowing it to be easily formed into an infinite variety of shapes to form stepped flashings, abutment flashings, chimney flashings, pitched roof valley liners, dormer window flashings, rooflight and solar panel flashings.

Ubiflex Finio features a fully-adhesive backside protected with a two-part removable film for convenient handling during application. Additionally, the rolls are equipped with two butyl adhesive strips—a unique bonding method—to ensure perfect adhesion to most materials. Ubiflex Finio can easily be formed by hand and as required be finished with a roller.

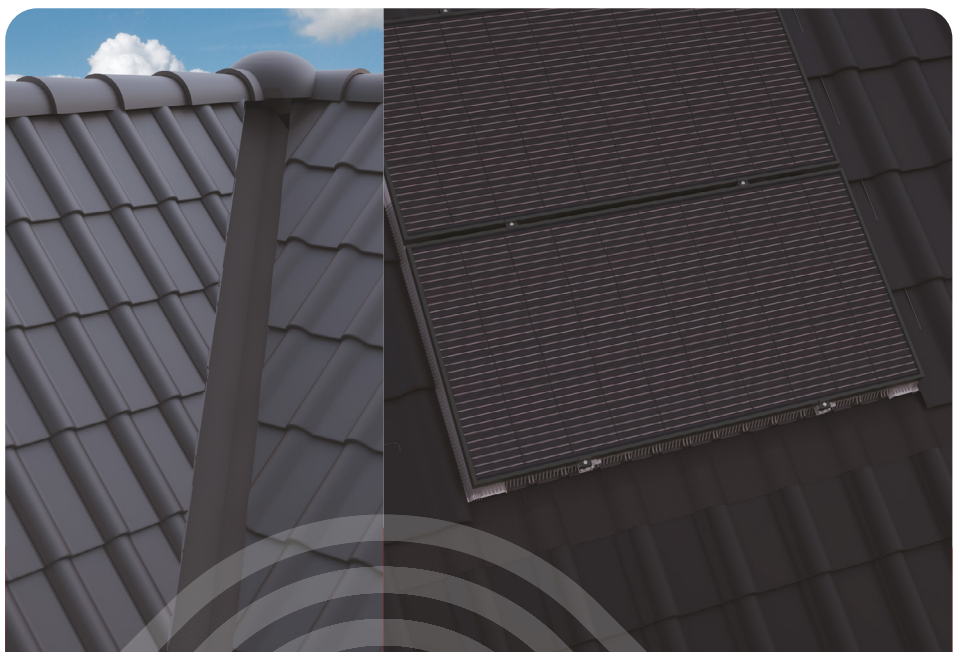

Its proven benefits include the following:

- EASY AND QUICK INSTALLATION.
- ADHESION TO MOST MATERIALS.
- DOUBLE ADHESION FOR HIGH PERFORMANCE AND DURABILITY.
- VULCANISES.
- NON-TOXIC AND NON-HAZARDOUS.
- AVAILABLE IN BLACK AND GREY.

Ubiflex Finio is not only suitable for new-build developments, but ideal for refurbishment and repairs due to its self-sealing backing.

Ubbink offers two other non-lead flashing alternatives: Ubiflex Standard and Ubiform +, giving you a full solution for whatever your project.

For more information, including videos, please visit www.ubbink.co.uk.

CROWSTONE COURT— A GREEN ROOF TRIUMPH

Crowstone Court, a Southend-on-Sea apartment block boasting breathtaking coastal views, faced a major waterproofing nightmare: a leaky podium deck flooding the car park below.

Contractors **RTB ROOFING LTD** and **PROTEUS WATERPROOFING** together crafted a solution that tackled both waterproofing and aesthetics, installing a fully-compliant green roof using the proven 25-year-guaranteed Proteus Cold Melt® system.

Proteus' detailed approach to the project started with a bespoke survey and specification, ensuring the client understood the problem and received the most cost-effective, durable solution.

With only five weeks to complete the contract, Cold Melt® proved its agility. Its seamless application minimised risk and kept construction on schedule. Additionally, its low odour and cold-applied application ensured resident safety and comfort.

There were several challenges; resident access, tight delivery windows and public

pedestrian areas demanded clever logistics. Proteus and RTB collaborated seamlessly, planning deliveries and material storage to minimise disruption.

Bespoke balustrades with hidden fixings preserved the terrace's elegance, while Proteus Pro-Living®'s green roof system added beauty and ecological benefits. This drought-resistant system, featuring 13 sedum varieties, thrives in UK weather, requiring minimal maintenance.

Crowstone Court now has a watertight, stunning terrace, happy residents and a satisfied client. The building stands as a testament to the success of teamwork, innovation and Proteus' unwavering commitment to quality—completing the project on time and within budget.

For further information please visit www.proteuswaterproofing.co.uk.

MARLEY SOLARTILE® INSTALLATION TRAINING COURSE PROVES A HIT WITH ROOFERS

As the demand for solar panel installation continues to soar, roofing contractors who have taken steps to offer solar installation as part of their standard roofing service are already seeing the benefit for their project opportunities.

But demand for solar panels still far outweighs the number of skilled installers available to fit them. That is why **MARLEY** is empowering the roofer by offering solar installation courses, which are available at least twice a week throughout 2024.

One recent course attendee thoroughly recommended the training, saying:

“

The course was very informative and the training session was run extremely well. Kevin was very professional and has a mass of knowledge.

”

Book you and your team on a course by visiting www.marley.co.uk/training/solar-pv-training.

Marley is also offering a free snood to help you keep warm this winter. Request yours at www.marley.co.uk/wintersafety.

2024 UK ROOFING AWARDS

“ THE 2023 AWARDS WERE A HUGE HIT. ”

100% OF GUESTS SAID THEY WOULD ATTEND AGAIN

AND

88% WOULD RECOMMEND IT TO OTHERS.

It's a great opportunity for networking—over 1,000 guests attended the 2023 awards.

Make sure you don't miss out on the roofing industry's premier event, celebrating the best of UK roofing across ALL disciplines.
